

DDI Implementation Consultant
[DNS/DHCP/IPAM]

Company Overview: Efficient IP [www.efficientip.com]

EfficientIP is a global provider of the most advanced and comprehensive DDI (DNS, DHCP, IP Address Management) products available. Efficient IP's SMART DDI approach offers enterprises and service providers a unique appliance based solution to intelligently simplify and automate design, deployment and management of the critical DDI infrastructure.

SOLIDServer™ centralizes all information from the IP plan and DNS and DHCP servers in one single interface and gives customers a consolidated overview to control the deployment of infrastructures and network services (VoIP, Datacenters, etc.).

Efficient IP has built strategic relationships with a number of software and hardware market leaders to develop complementary solutions and to enable new offerings from partners. This includes Microsoft, VMware, IBM, HP, SUN Microsystems, Dell, Red Hat, Novell, Cisco and ISC.

Efficient IP's client base includes hundreds of the most demanding companies in all business sectors to include Vodafone, EADS, Cap Gemini, HP, STMicroelectronics and T-Mobile with an established presence in the US, France, the UK, Germany & Spain.

Location: home-based office [must be in US]

Travel: up to 50% nationally

Position Summary:

Efficient IP offers a fast-paced, action-oriented environment. We promote a culture that embraces innovation, change, teamwork, and strong partnerships. This is a new role as a result of growth in the US market. We will provide product training.

Why this position is compelling:

- Serve as the DDI subject matter expert who represents Efficient IP and provides professional services
- Build relationships with customers, delivering outstanding service
- You contribute to the design and integration architecture of Internet information services appliances including DNS, DHCP, Security and Network Automation solutions.

About the position:

We are looking for a **DDI Implementation Consultant** for our Americas Team. The main focus is to implement our products and solutions to include:

- Migrating from existing DDI solutions to our solutions.
- Scripting and data manipulation.
- Architect, design and implement/integrate our solutions.
- Help out on support during escalation and level 3/4.
- Liaise with pre-sales engineers and other team members

Qualifications:

- Demonstrated technical experience with a focus on DNS/DHCP and/or IP Address Management.
- Technical experience to include:
 - Expert on DNS, including DNSSEC, working and protocol.
 - Expert on DHCP, working and protocol.
 - Expert on TCP/IP, both IPv4 and IPv6.
 - Master the DNS and DHCP of different vendors.
 - ISC, NLNetLabs and Microsoft is a must.
 - Procedure-based working (ITIL experience helps).
 - Be fluid in networking, routing, switching and security.
 - UNIX O/S knowledge and Active Directory experience a plus.
 - Be fluid in infrastructures and accompanying management systems.
 - Be familiar with scripting to automate tasks (Perl, Bash, PHP, etc).
- Lead and run projects
- Customer-facing experience a plus
- Strong communication, interpersonal and presentation skills, with ability to articulate complex technology simply is required.
- Strong technical problem-solving ability and troubleshooting skills
- Self-motivated and flexible.
- Ability to travel as needed
- Ability and/or interest working in a fast-paced environment where ownership of projects and personal responsibility is required
- Bachelor's Degree preferred but not required
- Must be able to work in the US without sponsorship
